

CS 631-02 Processor Design Pipelining

Single-cycle
multi-cycle
Pipelined

Doing Laundry

Laundry steps

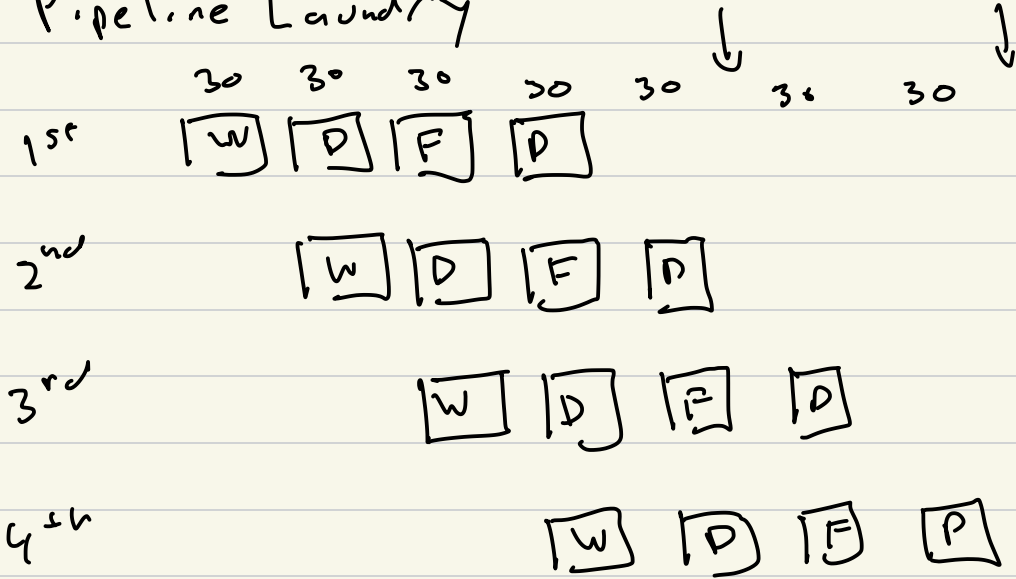

- 1) Wash
 - 2) Dry
 - 3) Fold
 - 4) Put away
- each step takes 30 mins

W D F P W D F D

4 hrs
2 load

Pipeline Laundry

Pipeline

2 loads 2.5
1 load 3.5

Serial

4 hrs
8 hrs

100 loads ?

$$(4 \times 0.5) + (100 - 1) \times (0.5)$$
$$= 2 \text{ hrs} + 99 \cdot 0.5$$
$$= 2 \text{ hrs} + 49.5 = \boxed{51.5 \text{ hrs}}$$

Serial ?

$$100 \times 2 = \boxed{200 \text{ hrs}}$$

$$\frac{1}{4}$$

Generally, with n stages

we can get $\frac{1}{n}$ speed up.
